Population Projections

Source: 2008-based sub national population projections, Office for National Statistics/Bucks Strategic Partnership (BSP) population projections October 2010

National population projections are not available at ward level but based on the latest national population projections South Bucks District is predicted to have a population increase of 25.9% over the next 25 years from 65,700 to 82,700 in 2033. The projections are trend based which means assumptions for future levels of births, deaths and migration are based on observed levels (they do not take into account any future policy changes that have not yet occurred). Within these figures based on projections for the district from 2008 to 2033:

- the 0-19 age group is predicted to rise by 20.1% (England 10.4%);
- the 20-64 age group by 15.5% (England 8.3%); and
- the 65+ age group by 63.9% (England 65.3%).

Local population projections at district and ward level (commissioned by Bucks CC) have been produced which take account of additional datasets including housing provision in the area and other local inputs. These put the population at 67,550 in 2026 (a difference of over 11,000 from the national projections for 2026). The projections cover a different time period and the age group breakdown is different. The significant variances between the projections means caution needs to be applied when using these figures as a realistic figure is more likely to fall somewhere between the two predictions (further information about both sets of projections can be found on KnowledgeSource).

Based on the BSP projections for Burnham Beeches the estimated population is forecasted to rise from 1,350 in 2009 to 1,300 in 2026 a decrease of -3.7%. Looking at a split down by age group based on projections for the ward from 2009 to 2026:

- the 0-17 age group is predicted to decrease from 250 to 200 (-20%)
- 18—retired* age group is predicted to decrease from 750 to 650 (-13.3%)
- retired* + age group is predicted to rise from 350 to 400 (14.3%)

(*retired is 60 for females and 65 for males)

Migrant Workers

Source: DWP 2010, Local Area Migration Indicators table from Office of National Statistics

Overseas nationals obtain a National Insurance (NI) Number before they enter into employment or upon starting work, so registrations data can be a good indication of new arrivals who are economically active. (Some foreign nationals do obtain a NI number but do not take up employment e.g. refugees will need an NI number but will not all be economically active.)

These figures are only available at district level and do not go down to ward level.

The top 6 nationalities for overseas nationals who are issued a National Insurance number entering South Bucks in 2010 were Poland, India, Australia, Germany, Italy and Spain.

Deprivation

Source: *Indices of Multiple Deprivation 2007, CLG.*

The Indices of Multiple Deprivation 2010 (IMD 2010) is a measure of deprivation at the small area level—Lower Super Output Area (LSOA). England is split into 32,482 LSOAs, LSOAs have a minimum population of 1000, and overall average population of 1500, and were ranked to create the IMD. All of the LSOAs in England are ranked, the LSOA ranked 1 by the IMD 2010 is the most deprived and the LSOA ranked 32,482 is the least deprived.

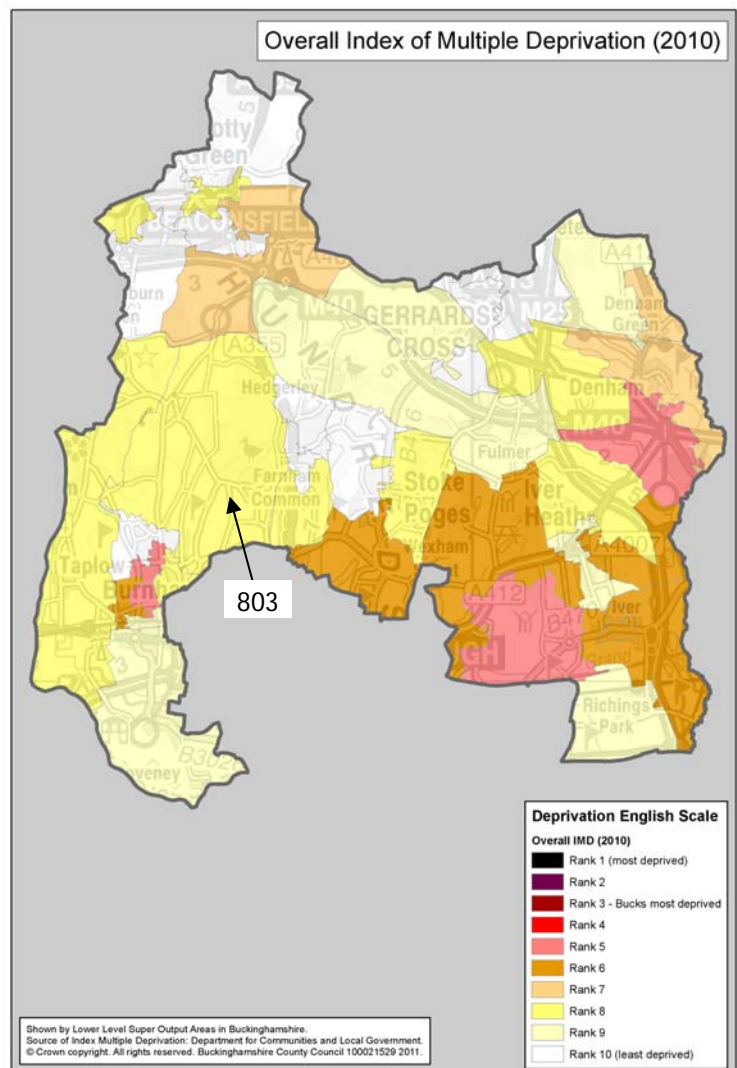

- Burnham Beeches Ward is made up of 1 LSOA (803 —location shown on the map).

The IMD model is based on 7 distinct dimensions of deprivation which are then given a weighting to work out an overall ranking for deprivation as the table below shows.

Domain	Weighting
Income Deprivation	22.5%
Employment Deprivation	22.5%
Health Deprivation & Disability	13.5%
Education, Skills & Training Deprivation	13.5%
Barriers to Housing and Services	9.3%
Crime & Disorder	9.3%
Living Environment Deprivation	9.3%

The different domains

- Income Deprivation covers a range of indicators including adults and children in Income Support/ Income-Based JSA/ Pension Credit/ certain child tax credit families and Asylum seekers receiving subsistence/accommodation support.
- Employment Deprivation measures involuntary exclusion of working age population from the labour market. This includes indicators on recipients of Jobseekers Allowance, Incapacity Benefits, Severe Disablement Allowance, claimants of employment and support allowance, participants in the New Deal for under 25s, over 25s and new parents.
- Health Deprivation and Disability domain measures rates of poor health, early mortality and disability in an area and covers the entire age range, it includes indicators on years of potential life lost, comparative illness and disability ratio, proportion of adults under 60 suffering from mood or anxiety disorders and measures of acute morbidity.
- Education Skills and Training Deprivation covers two sub-domains: one relating to education deprivation for children/young people in the area, and one relating to lack of skills and qualifications among a sub-set of the working age population.
- Barriers to Housing and Services domain splits into two sub-domains: geographical barriers which looks at road distance to a GP surgery/general stores or supermarket/primary school and to a Post office; wider barriers includes issues relating to access to housing such as affordability and household overcrowding.
- Crime domain measures the rate of recorded crime for four major crime types, representing the risk of personal and material victimisation at a small area level. These include Burglary, Theft, Criminal Damage and Violence.
- Living environment deprivation comprises two sub-domains: the 'indoors' which measures the quality of housing (housing in poor condition and without central heating), and the 'outdoors' which contains two measures about air quality and road traffic accidents.
